

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	MKU201AutoTicket
Project Name	Auto ticket classification using Flow Designer
Maximum Marks	

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
Applicant seeking a loan	Secure a loan for property	Married with no co-applicant income	Self-employed with a good credit history	Optimistic about loan approval

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An IT support team member handling school IT tickets.	Automatically classify incoming tickets.	Manual classification can be time-consuming and inconsistent.	Tickets need consistent categorization for proper handling.	More confident about faster and consistent ticket handling.
