

PROJECT EVALUATION DOCUMENT

3. Number of Functional Features Included in the Solution

Project Title	Auto Ticket Classification using Flow Designer
Team ID	MKU201AutoTicket
Date	30.09.2026
Platform	ServiceNow – Flow Designer / Workflow Studio

Functional Feature Count

Based on the submitted ServiceNow implementation screenshots, the solution includes the following core functional features.

No.	Functional Feature	Description
1	Custom Incident Workflow table	Stores ticket details required for classification and routing.
2	Ticket creation trigger	Starts the Flow Designer automation when a qualifying record is created.
3	Automatic category evaluation	Uses conditional branches to evaluate service-desk ticket categories.
4	WiFi / Network classification	Provides a dedicated branch for WiFi or Network-related tickets.
5	Project / Hardware classification	Provides a branch for Project or Hardware-related tickets.
6	Forgot Password classification	Provides a branch for Forgot Password-related tickets.
7	Automated record update	Updates the Incident Workflow record after classification.
8	Assignment / routing support	Uses assigned group and assigned-to fields for ticket handling.
9	Reusable Flow structure	Supports adding more categories and actions through additional branches.
10	Update Set packaging	Uses a Project Update Set to capture the configuration for deployment.

Total core functional features documented: 10

The count is based on the functionality evidenced in the supplied screenshots and is intended for project evaluation/documentation purposes.
