

Data Flow Diagram

Date	30 September 2026
Team ID	MKU201AutoTicket
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	2 Marks

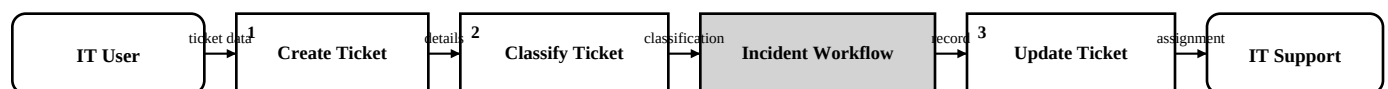

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Project Data Flow Diagram

Flow Designer checks the ticket category/description (e.g., WiFi/Network, Project/Hardware, Forgot Password) and updates the incident workflow record with category, subcategory, state, assigned group, and assigned user.
