

AUTO TICKET CLASSIFICATION USING FLOW DESIGNER

1. COMMUNICATION

Date: 30.09.2026 | Team ID: MKU201AutoTicket

Project Title	AUTO TICKET CLASSIFICATION USING FLOW DESIGNER
Date	30.09.2026
Team ID	MKU201AutoTicket
Platform	ServiceNow – Flow Designer / Workflow Studio

1. Communication Overview

The project communication plan ensures that requirements, workflow decisions, testing results and demonstration updates are shared clearly among the project team and stakeholders. Communication focuses on the ServiceNow implementation, including the Incident Workflow table, Flow Designer logic, classification conditions, assignment actions and test outcomes.

2. Communication Objectives

- Maintain a common understanding of ticket-classification requirements and expected workflow.
- Share changes to categories, conditions, assignment rules and notifications before testing.
- Record defects, test results and corrective actions during demonstration preparation.
- Keep project documentation aligned with the final ServiceNow configuration.

3. Communication Channels and Frequency

Activity	Method	Frequency	Purpose
Requirement discussion	Team meeting / discussion	As required	Confirm fields, categories, priority and routing rules
Development update	Discussion / screen sharing	During implementation	Review Flow Designer changes and configuration
Testing status	Test record review	Each test cycle	Confirm classification and assignment results
Demo preparation	Rehearsal meeting	Before final demo	Coordinate sequence, evidence and roles

4. Communication Deliverables

- Updated project description and workflow explanation.
- Screenshots/evidence of the form, table, update set and Flow Designer workflow.
- Test scenarios and expected results for different ticket categories.
- Final demonstration sequence and responsibilities.

5. Expected Outcome

All participants should have a consistent understanding of what the system does, how a newly created ticket moves through the flow, and how the final classification and assignment are verified.
