

AUTO TICKET CLASSIFICATION USING FLOW DESIGNER

5. TEAM INVOLVEMENT IN DEMONSTRATION

Date: 30.09.2026 | Team ID: MKU201AutoTicket

Project Title	AUTO TICKET CLASSIFICATION USING FLOW DESIGNER
Date	30.09.2026
Team ID	MKU201AutoTicket
Platform	ServiceNow – Flow Designer / Workflow Studio

1. Team Involvement Overview

The demonstration is divided into role-based responsibilities so the project is presented as a coordinated team effort. Names can be added to the role column before submission if required.

2. Responsibilities During Demonstration

Role	Responsibility	Demo contribution
Project coordinator	Maintain the overall sequence and ensure all required sections are covered.	Introduction, objectives and conclusion.
ServiceNow configuration lead	Manage table, fields and form configuration.	Demonstrate Incident Workflow form/table setup.
Flow Designer lead	Configure trigger, conditions and update actions.	Explain and run the classification workflow.
Testing & validation lead	Prepare sample tickets and verify expected outcomes.	Perform live test cases and show results.
Documentation / evidence lead	Maintain screenshots, update-set and deployment evidence.	Present supporting evidence and answer documentation questions.

3. Team Demonstration Sequence

- Coordinator introduces the project and explains the problem being addressed.
- Configuration lead presents the custom ticket form and fields.
- Flow Designer lead explains the trigger and classification conditions.
- Testing lead creates sample tickets and verifies the automated result.
- Documentation lead shows screenshots/update-set evidence and records key observations.
- Coordinator closes the demonstration with outcomes and future plan.

4. Team Collaboration Outcome

Each role contributes to a specific part of the demonstration while maintaining a common project objective. The role-based plan provides clear ownership and ensures that implementation, live workflow, testing and evidence are covered.
